

SR-74 Safety Improvement Project Traffic Advisory

Expect SR-74 Traffic Delays During Daytime Hours, December 19 - 21, 2007

WHAT: As part of the SR-74 Safety Improvement Project, construction crews will be conducting asphalt concrete paving in the construction area just east of the San Juan Canyon Bridge, weather permitting.

Work will require heavy equipment to be operated through this narrow, one-lane stretch of road. Anticipate delays. The work is being done during the day because cold temperatures at night prevent the asphalt from bonding to the roadway.

Motorists can avoid traffic delays by taking alternate routes.

Safety is Caltrans number one priority. Caltrans asks that motorists be mindful of the construction crews and equipment in this narrow work area. Decrease your speed through the posted construction zone. Fines are doubled in the construction zone and are being strictly enforced.

WHEN: Wednesday, Dec. 19, through Friday, Dec. 21 - 8 a.m. to 3 p.m.

WHERE: Just east of the San Juan Canyon Bridge

Orange County Freeway Construction Helpline - 800-724-0353
